# HOW DOES MINDER WORK?

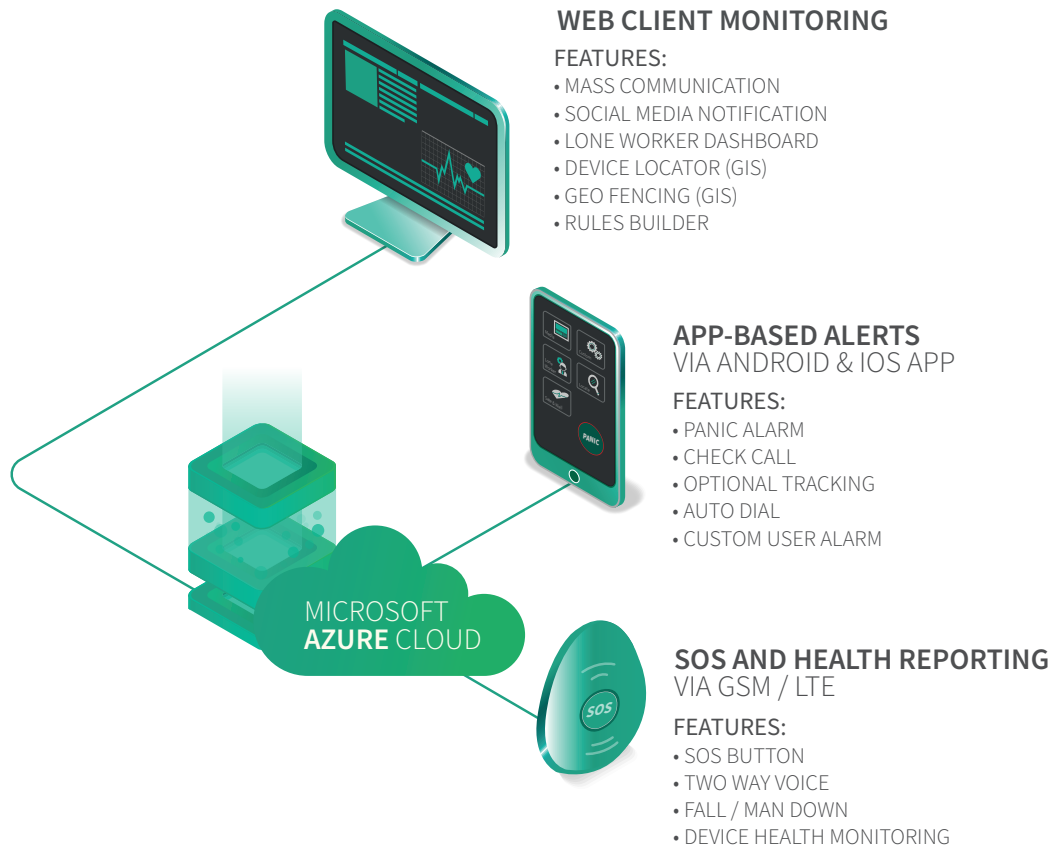

## SAFETY AND LOCATION SERVICES

With the software-as-a-service-solution Minder, companies can minimize their operational risk by comprehensively protecting employees (lone workers) and assets.

The management of employees and objects is realized via a web user interface based on a Microsoft Azure cloud server. Depending on customer requirements, Minder can also be implemented on a local server. The communication between the control center and the lone worker can be realized in two different ways, either via the Minder app or via hardware components such as SOS trackers.

In addition, Minder offers the possibility to warn employees such as lone workers of possible dangers via mass communication. In case of hazardous situations, employees or objects can be localized in order to initiate further actions.

All information is compiled in the Minder dashboard via a web user interface. This allows operational workflows to be better monitored, coordinated and managed.

Mass communication

# KEY BENEFITS

MINDER PROTECTS EMPLOYEES AND ASSETS

### No provisioning cost

Minder is provisioned on industry-leading Microsoft Azure cloud technology with no additional cost to implement or adapt the software.

### Duty of care

Organizations, schools and commercial businesses have a duty of care and are responsible for ensuring the wellbeing of lone workers in the field operating in public areas or areas with high crime, risk or injury.

### Lone workforce automation

Reductions in manual task and operations around legal duties of operation centers to record lone working or personal safety audit trails.

### Automate mass communication

Define and deliver clear communications across geo-located areas utilizing multiple communication channels. Reducing risk and operational cost for your security operations centers.

# LICENCE MODEL

FREE SCALABILITY - FROM SMALL TO COMPREHENSIVE SOLUTIONS

**EXPRESS**

**BASIC**

**PROFESSIONAL**

**ENTERPRISE**

Server type	Cloud	Cloud	Cloud	Cloud / local server
Max. number of users	up to 10	up to 50	up to 100	unlimited
